

NORITSU

QSS G-Series Printers

QSS-3800G

The new QSS-3800 G has a small footprint, yet is capable of producing prints up to 12"x36". To add to the cost savings, the QSS 3800G also uses the same paper magazine as many previous models of Noritsu 12" Printers. Those upgrading from a QSS-29, QSS-31 or QSS-32 will already have spare magazines.

QSS-3801G

The QSS-3801G also uses the same 12" paper magazine as several previous models of Noritsu Printers. Although it shares the compact design of the QSS-3800G, the QSS-3801G can produce twice as many 6"x4" prints as a QSS-3800. The QSS-3801G also employs a high resolution 640-dpi solid state Direct Modulation Laser.

QSS-3704G

For those in need of even more speed, the QSS-3704G provides both speed and versatility. The QSS-3704G can produce up to 2,117 6"x4" prints an hour or 614 10"x8" prints an hour. The QSS-3704G is a proven reliable design that has become an Industry Standard. With the QSS-3704G, you can choose to have a dual magazine system (Standard), a triple magazine system (Option), or even a quadruple magazine system (Option). The ability to set up to four paper magazines provides a huge advantage in paper change over efficiency.

QSS G-Series Printer Specifications

Print Size (Width x Advance Length)	Paper	QSS-3800 G *Printing Capacity	QSS-3801 G *Printing Capacity	QSS-3704 G *Printing Capacity
